

**Developing NavCare-EU:**  
a cost-effective patient navigation intervention that will support older people with cancer and their families in navigating the complexity of the healthcare system in Europe for them to have timely and equitable access to health and social care services.

## WHAT WE AIM TO ACHIEVE FROM 2022 TO 2027

Based on a successfully-tested patient navigation intervention from Canada, we aim to develop NavCare-EU and to evaluate its effectiveness and cost-effectiveness to improving quality of life of older people with cancer and their families in Belgium, the Netherlands, Ireland, Poland, Italy and Portugal.

**FUNDED BY THE  
EUROPEAN UNION**
